Profile

Full-Stack Developer focused on building secure, reliable, and user-friendly web applications. Experienced in developing systems that support team collaboration, ensure data protection, and follow privacy standards. Known for a structured problem-solving approach and a strong interest in data protection and risk management.

Technical Skills

Languages: Java, Python, SQL, HTML, CSS

Frameworks: Spring Boot, Django, Flask

Tools & Technologies: Docker, Kubernetes, AWS, Git, Redis, MySQL, JWT, WebSockets, Celery

Libraries & APIs: Tesseract OCR, OpenCV, Spring Security, React Vite, Redux

Work Experience

Ardur Technology

April 2024 – Present

Full-Stack Developer

Pune, India

- Architected and executed the full-stack migration from monolithic legacy software to a scalable, modular web-based system, enhancing maintainability and performance.
- Developed a **multi-role organizational platform** using Django and Jinja2 templates supporting HR, Managers, Clients, Finance, and Employees with secure role-based workflows.
- Leveraged **Django's built-in security features** such as CSRF protection, XSS sanitization, session management, and permission-based views to protect critical modules.
- Implemented **Role-Based Access Control (RBAC)** with 20+ granular permission levels to safeguard operations across departments like payroll, shift, and attendance.
- Integrated **Celery with Redis** to handle asynchronous tasks and heavy operations, reducing frontend blocking and improving responsiveness by 3x.
- Built an **OCR-powered Data Operations Platform** using Spring Boot, React Vite, OpenCV, and Tesseract, processing over 100K documents monthly with 95%+ accuracy.
- Ensured secure access to client-facing modules through encryption, session validation, and strict access control enforcement.
- Containerized Django and Spring Boot services using Docker to streamline development, testing, and deployment pipelines.
- Improved system performance by 45% through SQL indexing, cache optimization, and frontend refactoring using reusable components.
- Implemented secure user workflows using JWT authentication, encrypted sessions, RBAC, and Django's built-in protections including CSRF middleware, input sanitization, and permission-based access; experienced in privacy-first development.

Key Projects

E-Commerce Shopping Application | Spring Boot, React Vite, MySQL, JWT, Postman

CDAC Project – 2024

- Built a full-featured e-commerce system with user-friendly UI and secure role-based access for users and admins.
- Implemented secure **JWT-based authentication** with refresh tokens, access validation, and token revocation.
- Used Spring Boot to develop REST APIs and manage protected operations like cart, checkout, and user roles.
- Tested protected routes and API authorization using Postman to validate security behavior and user sessions.

Education

CDAC (PUNE), PG Diploma in Advanced Computing

Sep 2023 – Feb 2024

Pune, India — A Grade

GH Raison College of Engineering, B.Tech., Computer Science

2020 – 2023

Nagpur, India — 81.3%

Datta Meghe Polytechnic, Diploma in Computer Technology

2018 – 2020

Nagpur, India — 77.8%

Certifications

Post Graduate Diploma in Advanced Computing (CDAC) 🎓
